Windows.

At REHAU we engineer progress and are dedicated to enhancing the lives of our customers throughout the UK. This drives us forward to believe, achieve, and be a leader in our industry – now and in the future. Building on our past successes, gives us a forward-thinking perspective for continued success.

Attention to detail

Not only does the Rio flush fit range authentically replicate the features of traditional timber products, it also complements more modern homes perfectly with clear lines and minimalist appearance. This truly sets the Rio flush range aside in terms of look, suitability, safety and longevity.

Rio flush fit window & door system

When it comes to design features and sophisticated styling, the Rio flush fit range is in a class of its own.

The windows have been specifically designed so that the opening sash of your window sits flush with the outer frame, giving a unique sleek and seamless appearance.

As with all REHAU products, safety, security and longevity is paramount. Your Rio flush fit windows and doors benefit from enhanced noise reduction, energy efficiency and are easy to maintain, keeping them looking good throughout their lifetime.

The Rio flush fit range is further complimented by our door range. An outward opening Residential Door and French Door now gives customers a complete flush fit solution providing clean aesthetics across the whole home.

Based on an authentic, traditional design timber door, the Rio door solution carries all the modern benefits of uPVC and allows maximum natural light into your home.

Stay safe with Rio

Your home is the heart of family life, and knowing it is secure and protected is important. Rio flush fit offers a range of benefits to enhance your home, family and the environment.

A colour for all

A beautiful array of colour options and combinations present you with a range to suit any home style and décor preference.

Colour combinations

Every Rio flush fit product has the option of featuring the same colour finish inside the home, for a custom look consistent with the home's interior.

Choosing Rio flush fit will add a touch of timeless style. A combination of modern materials and a rich spectrum of colour options, offer a window and door with style and sophistication at its heart. From the traditional and highly textured Turner Oak, to the modern Anthracite Grey, you will find the perfect match for your home.

What does the Rio flush fit range offer?

A Energy efficiency rating
Choosing Rio helps your home to become more efficient and save money on your heating bills.

Noise reduction
Every one needs a good night's sleep and Rio offers exceptional noise reduction.

Virtually maintenance free
Timber windows and doors, require annual maintenance to ensure they are kept looking good - with Rio you can spend more time with your family.

Enhanced Security
The Rio range is PAS24 security accredited which gives you an added level of security to your home and family.

Weather Performance
Independently tested, Rio achieves the highest BSI ratings for wind, water and air protecting your home from the elements.

Sustainability

Shaping the future together

As a manufacturer, REHAU is conscious of the impact their actions have on people and the environment. The use of recycled materials is one of REHAU's strategic objectives and we are committed in supporting that objective by leading change in attitudes and accessibility of recycling.

Production

Our partner customers produce EcoPuls labelled profiles, to bring you eco-designed, sustainability-produced products that **save up to 97,000 tonnes of CO₂ per year.**

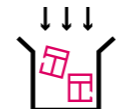

Installation

REHAU products with the EcoPuls label are then installed in your home by our network of partners, **save 13 kg of CO₂ in replacement and 17 kg of CO₂ in new construction, per window.**

Manufacturing

REHAU manufactures profiles with the EcoPuls seal. Thanks to the co-extrusion process, REHAU combines recycled and virgin raw materials without impairing the performance and usability of the new profile.

Collection

Every year, **millions of old uPVC windows, doors and production offcuts** are reused in the production of new profiles with the EcoPuls label. For this reason, REHAU maintains an extensive network for the collection of these materials.

Recycling

Collected old windows, doors and production off-cuts are carefully selected and sorted into different raw materials (e.g. glass, uPVC and steel) and then recycled. The uPVC components are then processed into high quality chip. The production of EcoPuls uPVC recycled profiles **saves up to 88% in CO₂ emissions**, compared to the production of a standard profile on the market.
